

Technical & Vocational Training

STA offers a wide range of technical and vocational training programs that are designed to provide entry-level theory/practical engineering/technological skills, through to Technical Diplomas.

STA has many years experience in training GCC Nationals in technical vocations. Training is carried out to the highest international standards of accreditation, including the Australian Qualifications Framework and the UK's National Vocational Qualification Framework (NVQ).

Training can be provided from Foundation to Higher / Advanced Diploma level in a number of engineering disciplines.

To support the delivery of these learning programs, STA has purpose built mechanical, electrical and scientific workshops available in a number of locations. In addition, STA can deliver training programs in customer facilities as required.

Examples of STA's Accredited Technical and Vocational Training solutions include:

Certificate to Advanced Diploma (Higher Diploma) in the following disciplines:

- Aircraft Maintenance and Aerospace Engineering
- Mechanical Engineering (Maintenance)
- Electronics / Electrical Engineering (Maintenance)
- Electromechanical / Mechatronics
- Automotive Engineering (Maintenance)

Examples of other Specialist Training Programs include:

- Human Factors in Aviation
- Project Management
- Electronic Warfare
